**Bat Migration:** Activities related to the bat migration are only available when the straw-coloured fruit bats are present the park. The start of the congregation has historically varied from end of September to middle of October, and generally ends between mid December and early January.

**Bat Hides:** Although there is almost always enough room for everyone, access to the bat hides will be given as a priority to the Fully Inclusive customers. As such campers cannot be guaranteed access to a viewing platform, exclusively or otherwise. Because many factors affect the access to certain hides (weather, physical condition of the guests, etc.) the planning for accessing hides is reviewed daily. The clients cannot be guaranteed access to a specific hide but preferences are, of course, taken into account.
