ROADS:

There are 18,482 km of highways in Botswana, of which 4,343 km are paved. Road conditions in the reserves of Botswana are extremely rough and dusty, and the roads can be badly signposted. Four-wheel drive vehicles are essential, as are good driving skills. Botswana is not recommended as a self-drive destination, except as a 4x4 adventure. If driving in Botswana, your normal driving license is accepted, with an English translation, if necessary. Driving is on the left side of the road. The national speed limit on tarred roads is 120 km/h and 60 km/h in towns and villages. Watch out for wildlife!

RAIL & BUS:

A single railway line runs from Ramatlabama on the South African border to Ramogwebana on the Zimbabwean border. The main stops on this route are Lobatse, Gaborone, Mahalapye, Palapye, Serule and Francistown. Public transport is very limited. Bus and minibus services operate in the more populated areas, but service is generally unscheduled and runs according to demand. As rail service is scheduled, it is a more reliable form of public transport.
