AUGUST 2020

Stretching from the Linyanti River all the way to Savute Marsh, the winding waterways of the Savute Channel have pumped life into the western section of Chobe National Park for thousands of generations. However, this fickle and unpredictable channel has a fascinating history of flooding and drying up, independently of good rainy seasons and flood levels elsewhere. The Savute region and the Savute Marsh in particular, is renowned for its intense predator encounters and exceptional game viewing making it one of Botswana's most popular wildlife destinations.
