### Best time to travel:

We say year-round, as each season and month provides its own experience. It all depends on your preference between summer and winter. Generally during the winter months, the animals congregate to all the larger bodies of water as the bush becomes very dry. During the summer months the vegetation is lush and alive with birdlife and baby animals.

### Health Information:

Thabamati is situated within a low-risk malaria area, please chat to your local GP for proper prophylactics before embarking on your safari.
