Nasikia Camps

Serengeti | Ngorongoro | Tarangire | Manyara

Did You Know?

The wildebeest migration is the movement of more than 2 million animals (wildebeest, zebra, and gazelle) across the Serengeti in Tanzania and for a much shorter time in the Masai Mara in Kenya. The migration moves in a clockwise direction following the rainfall and the availability of food and water. The wildebeest migration is the largest animal migration in the world and one of the "Seven Wonders of the Natural World".
