Respectful to the land and people, we take our place in this inspiring community with a conscientious and impassioned commitment to its natural and cultural sustainability.

COMMUNITY & CULTURE - SOCIAL IMPACT

We are steadfast in embracing and supporting the local community with economic and employment opportunities upon breaking ground from planning, building to completion stage of the JW Marriott Masai Mara Lodge. The lodge has rehabilitated access roads to the property, installed power to the area, and provided access to clean drinking water through a water treatment plant. Food waste is placed at the lodge's compost site; and water troughs are dotted around the lodge for community's livestock to quench their thirst throughout the day.

Further plans to increase our economic and social involvement to the betterment of the community welfare.

A LIFETIME OF MEMORIES

A typical day on safari in Masai Mara begins with an early morning game drive, when the animals are most active. Accompanied by our experienced guide, guests can set out in an open 4x4 custom designed vehicle to explore the savannah and spot wildlife in its natural habitat. Our guides are knowledgeable about the animals and their behavior, and they can provide fascinating insights into the ecosystem and the intricate relationships between the various species.

During the game drive, guests might encounter herds of wildebeest, zebras, and gazelles grazing on the grasslands, or catch a glimpse of a lion or cheetah. They may spot a leopard or a black rhino using Canon's photography equipment and binoculars provided by the lodge.
