

INTIMATE CAMP SERONERA

Fact Sheet

Introduction

Intimate Places is a Tanzanian hotel management company established in 2004. Since 2008, the company has been operating luxury camps in all parts of Tanzania's world famous Northern Safari circuit.

On the 1st July 2022, Intimate Places opened a brand new semi-permanent camp in the Serengeti National Park. "Intimate Camp Seronera" is the sister camp of "Intimate Camps" and "Intimate Camp Zebra." As the name implies, it is located in the Seronera area of the world-famous Serengeti National Park and is a semi-permanent camp boasting 12 tents including two 2-bedroomed family suites. The camp is open all-year around.

Location

The camp is located approximately 5 kilometres (3 miles) from Seronera on what was previously known as 'Turner 3 Special Campsite. GPS coordinates for the camp are -2.41598, 34.88811.

Accommodation

'Intimate Camp Seronera' consists of 12 accommodation tents, each of which can be used for single, double (or twin) or triple occupancy. Each sleeping tent consists of a verandah, bedroom area, dressing area and ensuite shower and flush toilet.

As an added convenience, each tent is supplied with electricity for lighting as well as for charging mobile telephones, cameras, tablets, laptop computers or any other electronic devices you may carry with you. This electricity is harvested from the sun's rays via a solar system.

Because the camp is semi-permanent and is not intended to move from its current location for the foreseeable future, all accommodation tents are built on raised platforms and have proper plumbing with hot and cold running water 24/7. As with the electrical supply, hot water is also harvested from the sun's rays via a solar system. All accommodation tents have access to the camp's WiFi network.

Family Accommodation Tent

Intimate Camp Seronera has two family tents which consist of two normal tents interconnected by an enclosed corridor.

Lounge & Dining Tents

The camp is well laid out to include both a lounge tent as well as a dining tent.

The lounge tent is furnished with comfortable settees and armchairs and is complete with a selection of Coffee table books, board games, a writing bureau and wireless internet connectivity so as to ensure that your every need is catered for when you are not out enjoying game drives.

The dining tent allows for individual as well as group dining and is home to a well-stocked bar which serves a selection of premium spirits, wines, beers and minerals, the cost of which is included in your accommodation rates. Guests may also enjoy their meals al-fresco in the camp's grounds.

Evenings are spent around the all-important camp fire enjoying drinks and bitings whilst exchanging stories about the day's events and making plans for the day ahead.

Activities

The main emphasis of the activities available at Intimate Camp Seronera' is the extraordinary wildlife to be found in the Seronera area. This wildlife includes Lions, Leopards, Cheetah, Buffalo and Elephants to name just a few. Twice a year, usually in May and November, the extraordinary Wildebeest migration passes through camp on its way North and then South again. This migration is one of the "Seven Natural

Wonders of Africa" as well as the single largest mass movement of animals on the planet.

Guests may also participate in Balloon Safaris during the course of their stay although arrangements for this normally need to be made prior to your arrival in Tanzania. They can also enjoy a range of relaxing massages carried out by our professional masseuse during their stays with us.

'Fly-in' and 'Drive-in' Safaris

Intimate Camp Seronera can also be booked as a 'flying Safari' destination with both airstrip transfers and game drives being carried out in our own 4 x 4 vehicles driven by our own highly trained professional guides.

Intimate Camp Seronera and the environment

With 20 years' experience operating camps in the different national parks making up the Northern Safari circuit, Intimate places has developed very strict policies and procedures with regards to the protection of the fragile environments in which we operate. These are also to be found at Intimate Camp Seronera.

- All the camps power requirements is generated through a state of the art solar power system. A standby generator is on hand for use only when required.
- Intimate Places is proud to support the "throttle the bottle" initiative whereby plastic bottles are banned from all of our properties.
- The garbage produced by the camp is burned in especially designed and constructed incinerators with plastics, tins and glass, etc. all being transported back to Arusha for proper disposal at municipal facilities.
