A HEARTWARMING *Conservation* EXPERIENCE

We are proud to share Mpumalanga Helicopter's exclusive new fly-in excursion that will touch and inspire you...

CARE for WILD
focuses on the
**RESCUE, REHABILITATION
& REWILDING OF
ORPHANED RHINOS**

&
**Mpumalanga
HELICOPTER CO.**

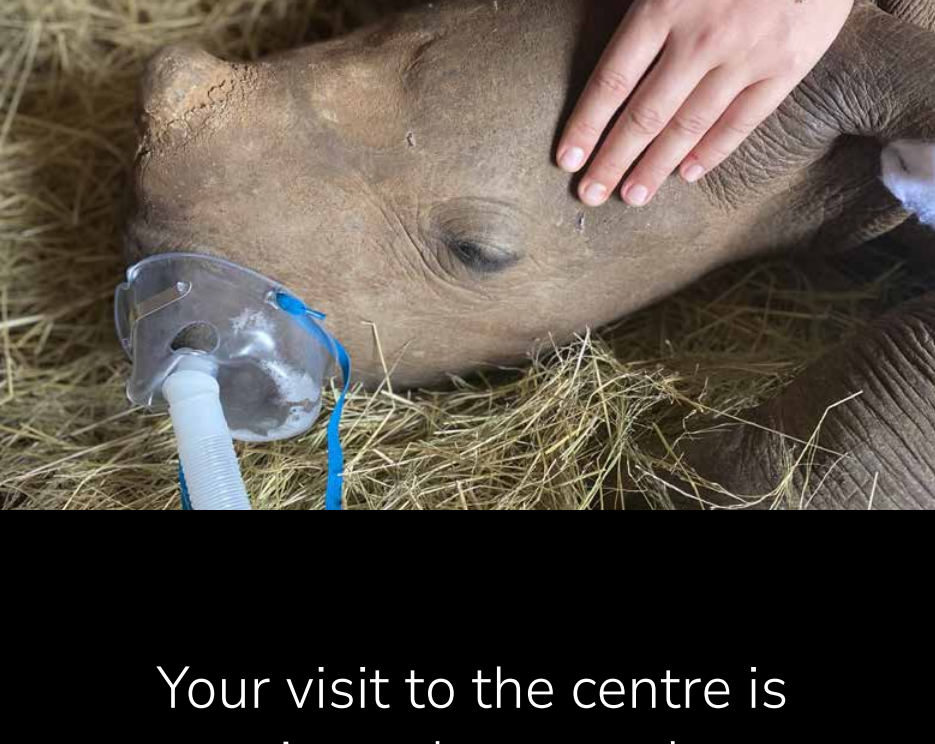

In partnership with Care for Wild, Mpumalanga Helicopter Co. offers you a unique fly-in opportunity to visit an extraordinary sanctuary for orphaned rhinos.

Founded by Petronel Nieuwoudt, Care for Wild is the world's largest rhino rehabilitation centre providing highly specialized care for young rhinos left orphaned and defenceless by poachers.

Here you will see first-hand how one person's vision, determination, passion and perseverance have positively impacted the rescue and care of young rhinos affected by poaching.

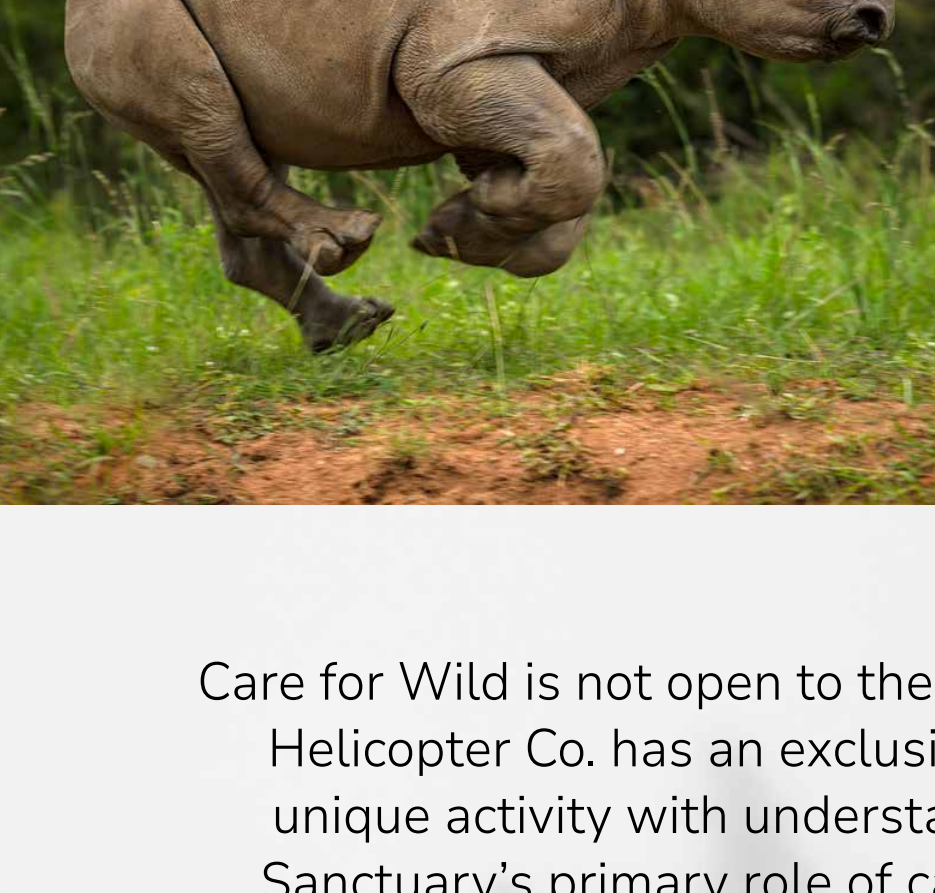

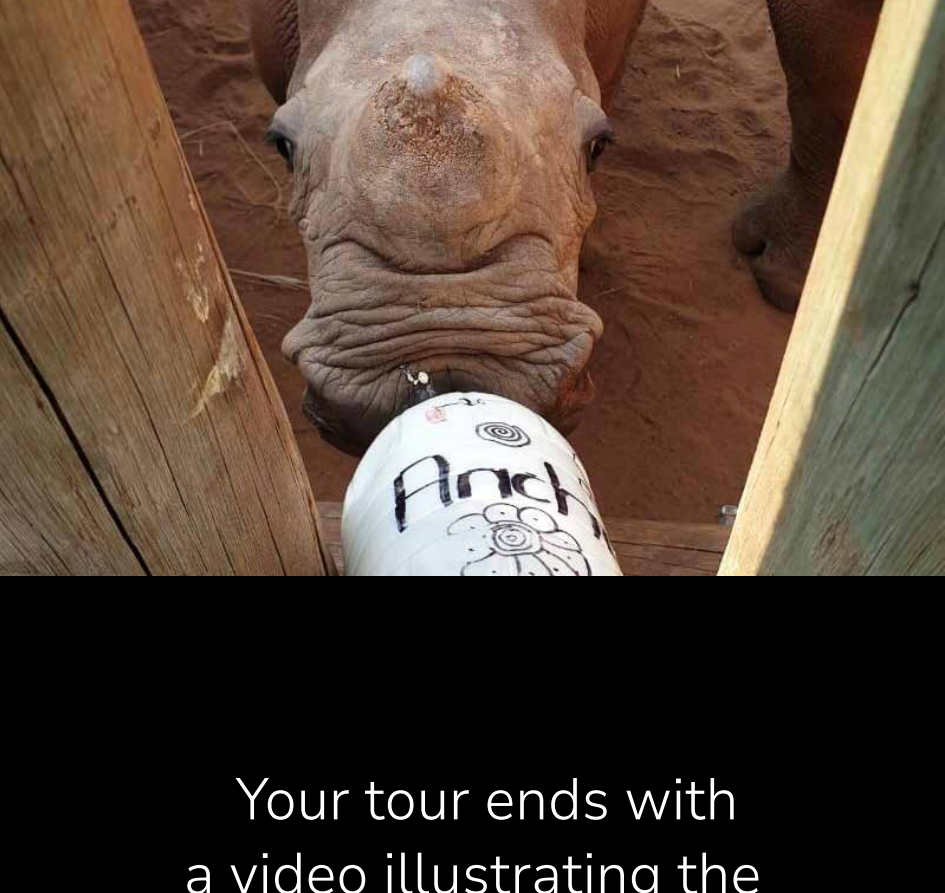

THE EXPERIENCE

The successful rehabilitation of an orphaned rhino calf takes commitment, dedication and above all, time.

There are multiple stages within the journey, each phase is designed to heal, nurture and prepare the growing calf for release back into the wild.

Your visit to the centre is a unique chance to be a small part of this incredible journey, the highlight of the activity is meeting some of the sanctuary's patients and helping with feeding.

Your tour ends with a video illustrating the Sanctuary's Mission, Purpose and Vision for caring for and protecting rhinos.

Care for Wild is not open to the general public. Mpumalanga Helicopter Co. has an exclusive agreement to offer this unique activity with understanding and respect for the Sanctuary's primary role of caring for the rhino, and the necessary confidential nature of their operations.

Please be aware that time is of the essence when rescuing and caring for traumatized rhinos, and as such, some areas of the sanctuary may not be accessible during your visit.

SAVE RHINOS... TO SAVE PEOPLE... TO SAVE TOMORROW

Together we can make a difference in saving the rhino population.

We look forward to sharing this exclusive experience.
