

Greetings Birders!

The following is a list of the 608 bird species that have been recorded for Sacha Lodge, since observations began in 1991. In addition to the birds found on Sacha Lodge property, recorded in transit on the Napo River, and around Coca, those seen on the trails South of the Napo River (Nuevo Providencia, Anangu) have also been included.

In regions of amazingly high biodiversity, such as we have here, numbers of individuals of a given species (density) may be low, but the variety of species that may be seen is astounding. Some of the birds on the list are rarely encountered or have only been observed once or twice, though one should not be surprised if one or two common species are missed, and replaced by one or two which are typically very rare. Numerous species that occur here are migrants, both Boreal and Austral, and are, therefore, seen only during certain times of year. Alongside each listing is important information which may help distinguish birds in the field, including relative abundance, habitat, and migratory status.

It is important to remember that no list is ever complete or absolute. The locations of birds sighted at Sacha may certainly vary and change, and there are undoubtedly more species yet to find. If during your stay, you encounter any species of special note and would like to register your observations, please feel free to aid us in our study of the birds here by sending your detailed notes to info@sachalodge.com, or by mail to Sacha Lodge, Julio Zaldumbide #397 y Valladolid, Quito, Ecuador.

Thank you and Good Luck!!

Revised and updated in September, 2005, by Forrest Rowland, Oscar Tapuy, Carlos Hualinga, Marcelo Andy, and Olger Licuy.

This list is based on earlier versions by Oscar Tapuy and Randy Smith (2003), Lee Schel, David Hoddinott and Barry Thompson (1998, 2000, 2001), J.R. Fletcher (1996) and G. de Smet (original version 1992).

In addition to the names seen here, Sacha lodge would like to express its gratitude to Richard White, Paul Greenfield, and Jarol Vaca, for their help in producing this and other updated versions.

Abbreviations

Abu (abundance): A - Abundant; recorded approximately 10/10 visits to proper habitat
C - Common; recorded approximately 7/10 visits to proper habitat
U - Uncommon; recorded approximately 5/10 visits to proper habitat
R - Rare; recorded approximately 1 to 5 annually
1 - Extremely rare; recorded approximately 1 to 5 times in the history
of observations here at Sacha Lodge
nt - Near-threatened, according to The World List of Threatened Birds
(Collar et al., 1994)
e - Endangered, according to the List of Birds Threatened with
Extinction in Ecuador (Granizo et al., 1997)
v - Vulnerable, according to the List if Birds Threatened With
Extinction in Ecuador (Granizo et al., 1997)

Loc (locality): T - recorded most frequently from the Wooden Tower and Canopy Walk
A - Has only been observed along the trails on the South side of the Napo
river.
(A) - Has been recorded on Sacha property North of the Napo, but can only
expected on the South side of the Napo River.
H - Heard more often than seen

Hab (habitat): T - Terra Firme forest
V - Varzea; forest periodically flooded by white water from the Napo
I - Islands, riverbanks and the gallery forest of the Napo River
L - Blackwater lagoons such as Pilchecocha
C - Blackwater creeks and interior forest streams, such as Orquidea Creek
S - Secondary Forest, cultivated areas, and pasture
F - In Flight, over varied habitats

Mig (migrant): N - Boreal migrant coming in from the North, mainly seen from
September to April
S - Austral migrant coming in from the South, mainly seen from April to
September
? - Applies most to species that migrate within the Amazon Basin itself
and those few species that have East to West migration patterns. Can
be erratic.

Appendices

**Both appendices (Appendix A, Appendix B) will follow the main list as
separate text. Appendix A is a taxonomic list of the birds recorded in the Coca area,
by visiting birders and guides. These are not included in the Main List, as the Main
List applies to those species recorded on Sacha property itself. Appendix B is a list
of the birds removed from the main text due to the extreme unlikelihood that they
will be encountered again, or because the sighting is questionable in nature. These
species should by no means be expected by the visiting birders, though they are**

worthy of mention, nonetheless. If recorded and confirmed, in the future, these species may be upgraded to the Main List.

Bird Taxonomy of all lists follows recently acknowledged changes and the order according to The Birds of Ecuador, Ridgely and Greenfield, 2001, Cornell University Press, Ithaca, New York, United States of America.

Appendix A

Accipitridae

- Pearl Kite *Gampsonyx swainsonii*
White-tailed Kite *Elanus leucurus*

Trochilidae

- Lazuline Sabrewing *Campylopterus falcatus*

Tyrannidae

- Vermilion Flycatcher *Pyrocephalus rubinus*
Cattle Tyrant *Machetornis rixosus*

Emberizidae

- Blue-black Grassquit *Volatinia jacarina*

Icteridae

- Red-breasted Blackbird *Sturnella militaris*

Appendix B

Rallidae

- Red-winged Wood-Rail *Aramides calopterus*

Psittacidae

- Military Macaw *Ara militaris*

Cuculidae

- Red-billed Ground-Cuckoo *Neomorphus pucheranii*

Apodidae

- Chapman's Swift *Chaetura chapmani*

Thamnophilidae

- White-browed Antbird *Myrmoborus leucophrys*

Mimidae

- Long-tailed Mockingbird *Minus longicandatus*
