HABITAT & WILDLIFE

Etosha Pan

Etosha Pan is the result of a geological shift that dramatically changed the course of the Kunene River. Its 5 000 km² / 1 930 sq. miles (120 km / 75 miles across and 55 km / 34 miles from north to south) were formerly an ancient lake. Today the Pan is mostly bone dry, the stark, parched white surface giving the Pan its Herero name, "Great White Place." The edges of the Pan give way to a surprising variety of vegetation types: from woodland and broad swathes of mopane, to open acacia-strewn plains and grasslands. Fringing the Pan are a number of productive waterholes that sustain the high density of large mammal fauna, from elephant and lion to vast herds of springbok, wildebeest, zebra, giraffe and gemsbok.

Ongava Game Reserve

On the southern boundary of Etosha National Park and forming a buffer to the Park lies Ongava Game Reserve, a 30 000-hectare (74 129-acre) private reserve. It is a haven to large concentrations of wildlife: notably lion, wildebeest, springbok, gemsbok, Hartmann's mountain zebra, red hartebeest, giraffe, eland and the largest population of the endemic black-faced impala outside of Etosha. The Reserve is also known for the successful reintroduction of white and black rhino. Ongava also provides easy access to the prime game viewing areas of central Etosha, Namibia's flagship national park.

Game Viewing

Guests at Ongava Game Reserve have the opportunity to view game both on Ongava and in neighbouring Etosha National Park. Large herds of plains game concentrate around the waterholes in the dry season, making for exciting wildlife viewing. Most general wildlife species are present on Ongava Reserve as well as within Etosha, including springbok, gemsbok, wildebeest, Burchell's zebra, Hartmann's mountain zebra, waterbuck, red hartebeest, giraffe, eland and the endemic black-faced impala. Lion move between the Park and the reserve and both black and white rhino can be seen.

Birding

Birdlife is prolific on Ongava with 340 species including Ostrich, Kori Bustard, White-tailed Shrike, Short-toed Rock Thrush, Hartlaub's Francolin, Rüppell's Parrot and raptors, such as Greater Kestrel, in abundance. Local specials include Namaqua Sandgrouse, Double-banded Courser, Yellow-bellied Eremomela, Spike-heeled Lark and Acacia Pied Barbet.
