WALKING IN THE FOOTSTEPS OF MAN - EXPEDITION CAMPING TOUR OPERATOR RATES 1* January 2019 to 31* December 2020

US Dollars including VAT

OVERVIEW

We currently service 2 options:

1. Natron to Olduvai variation: ideal to END in Serengeti
2. Olduvai to Natron variation: ideal to END at Lake Natron

1. LAKE NATRON CAMP, NGARE SERO: This is our existing established camp on the edge of Lake Natron and offers a great part to the trekking expedition where guests can do other activities such as gorge waterfall walks, flamingo walks and dramatic sundowners or just relax!
2. SANJAN GORGE: Located in the Gol Mountains. This camp is a truly special off the beaten track location away from the crowds. Whilst here you are able to meander deep into the gorge, following the Maasai and their cattle, camping underneath the stars and cooking on the open fire.
3. PIYAYA: Located in the Gol Mountains. This camp will move due to the weather. Piyaya is renowned for being a haven for early man- with year round springs of fresh water both man and beast could survive here in the harshest of times. Walking with Maasai warriors, in places very few have been, you are able to explore the rolling hills and secret caves of this fascinating place. If the migration is in this area there are also options for game drives.
