

Animal Tracking and Identification

Our guides are able to take our younger guests on special, shortened game drives to explore all the different animal tracks that one can find in the Madikwe Game Reserve. There is even a possibility of rebuilding animal skeletons which will teach our young guests about different animal structures.

Junior Chef Cooking Classes

All young guests are welcome in the Molori Safari Lodge kitchen where they can try their hand at baking, frosting cupcakes or anything their heart desires, even if that is making more 'grown-up' dishes, like pasta or bread from scratch.

Fishing

We have a wonderful fishing spot for those who choose to take a break from the game drives and spend some time alongside a river to try their hand at catching fish.

Poo'ology

A really fun event where our guides take our young guests on an adventure to find different animal droppings which goes with a lesson on different poo and why!

Plaster Caster

This is a fun exercise – making take-home plaster casts of various animal tracks.

Nature Survival

Our guides assist with making a toothbrush from a guarri bush or allowing kids to try their skills at making a bow-and-arrow from a resin bush.
