INTRODUCTION

Join us daily at dawn to witness these incredible creatures emerging out of their burrows, just in time to soak up the sun before they head about their daily activities. Meerkats are also referred to as the Suricate or in German as the Erdmännchen and are known to be part of the Mongoose family. They are small species of foraging mammals that are usually found inhabiting the harsh conditions of the open and arid, semi-desert plains in Southern Africa. Meerkats are known for their upright stance and their sociable behaviour. Buffelsdrift Game Lodge is situated in the heart of the Klein Karoo and offers the ideal environment and vegetation for Meerkats to thrive.
