

Hwange Bush Camp is situated in the remote northern region of Hwange National Park in Zimbabwe. Situated in the hilly countryside of Deteema Dam, the Robins Area offers guests scenic diversity with huge open grass lands, natural springs and pumped water points. Wildlife game viewing activities include drives in open 4X4 safari vehicles, or guided walks accompanied by one of our Professional Guides, ensuring your safety and giving guests an exciting and educational view of the bush at grass roots level. Our aim is to provide visitors with an exceptional game viewing experience in the African bush that is second to none.

Nestled under the canopy of trees, our Bush Camp caters for a maximum of twelve guests in six spacious and tastefully decorated twin bedded Meru tents, each with private en-suite facilities including flush toilets and a bush shower with hot water being made available on request. The shady lounge and dining area is the focal point of the camp, tastefully decorated with rustic hints of old world colonial charm, reminiscent of those enjoyed by early explorers to the continent. Our bush camp kitchen provides delicious meals cooked on a wood burning stove, and with advance notification, our qualified chefs are happy to cater to guests dietary requirements. The camp runs on solar but there are charging stations for recharging camera and laptops etc.

Our rates are fully inclusive of all game viewing activities, accommodation, meals, local alcoholic and non-alcoholic beverages (imported and premium spirits can be arranged on request at the guest's added expense).

Each day presents new and exciting experiences for our guests as they awaken their senses to the sights and sounds of the African bush whilst exploring this remote and achingly beautiful National Park.

Hwange Bush Camp is seasonal and is open from 01st May – 31st November.
