

# Plastic Free Safaris

When it comes to travel, plastic waste has a massive impact on the environment. Plastic is destructive to the environment, a threat to wildlife and there are limited recycling options in Tanzania.

Our aim is to organize our safaris plastic free.

Together we can make sure we keep Tanzania clean! We are dedicated to reducing plastic litter and pollution and we hope so are you!

So where do you begin with such a challenge?

- Bring a refillable water bottle on your trip
- Take a water filter or purifier with you
- Don't use the free plastic bottles offered to you

During your safari we will make sure you can refill your water bottle in the safari vehicle.

A safe way to purify your drinking water is to use one the water filters as SteriPen, Grayl or Lifestraw Go.

Some lodges provide plastic bottles of water in the rooms. If you use them, you will find them neatly replaced the next day with new bottles. So better to leave the single-use plastic bottles on the counter.

We wish you a beautiful plastic free travel!
